70+ BULLS

SALERS • OPTIMIZERS

NORTHERN *Exposure* SALE

Welcome to the 10th annual "Northern Exposure" Bull Sale. We at Elm Creek Ranch, along with our good friends Dave and Brad Feist at Feist Salers Ranch, are proud to promote and sponsor this quality sale.

To give you a little background on the Elm Creek program, this is our tenth production sale; however we have been selling bulls at the Midland Bull Test for over 35 years with eleven World Champion Pen of Salers bulls.

At Elm Creek Ranch we have left no stone unturned in providing comprehensive, detailed and accurate records of the individual bulls in the sale along with complete background data on the dam's of the bulls. Please note docility scores in the sale catalogue: 1 = superior/quiet/above average; 2 = Good/Acceptable/average; 3 = somewhat nervous/below pen average; 4 = Nervous. Note the sale bulls lot tags are color coded to correlate to their percentage Salers: Orange=Purbred Salers; Pink=7/8 Salers; Purple=3/4 Salers; Red=5/8 Salers; White=1/2; Green=>50% Angus and <50% salers; Blue=Registered Angus.

Again this year the sale location will be at our Elm Creek South Ranch which is located right off of Interstate 94 at exit 102. If coming from the west it is simply a U-turn off of the interstate right into the ranch. If coming from the east, take a right off of the interstate and go through the underpass and take the first right turn into the ranch. Sale will be at 2:00 PM CDT with lunch served at 12:30.

We have produced a number of quality bulls in this program by focusing on certain traits that lead to success. Comprehensive, accurate records are important at Elm Creek, which is reflective in the ranch being many times awarded "Performance Breeder of the Year" (Over 50 head Salers cows). In addition, we cull extensively for maternal traits, specifically fertility, structural integrity and milk. The majority of our male (2/3) calves are marketed in the fall as feeder steers and as such, it is important for us to have a consistent product for the feeder calf buyers. To assure this consistency, we select our AI sires and herd sires based upon (1) disposition, (2) structure and (3) phenotype. You will have your chance to pick from the top 1/3 of our bull calf crop at the "Northern Exposure" Sale.

The bulls were vaccinated Inforce at birth; UltraBac 7 and Bovishield Gold One Shot in April; with Bovishield Gold/One Shot and Seven way with Somubac in July and were boosted with Bovishield Gold 5 and Somubac in September. In addition, they have been poured twice with Clean Up II. The bulls will have received their Fusogard booster prior to sale date. To maintain breeding soundness and structural integrity the bulls were not fed any corn silage. The bulls have been fed a high roughage ration with consistent feed daily intake hand fed at 0.75% of their body weight maxed out at 9 pounds per day with Bull feed from the "The Mill" at Glen Ullin, ND and free choice Baleage (barley and alfalfa) along with free choice prairie hay. Yearling weights and scrotal measurements were taken February 7, 2024. with gain on test weights were taken on January 27, 2024. All Weaning weights were taken without the benefit of any creep and no creep feed of any kind was ever fed to the calves at any time with the bulls hand fed after weaning. The gain on test period started November 4, 2023 with weight out taken January 27, 2024. After test weights were taken the feed was reduced to 7.5 pounds per day.

The Elm Creek Bulls have had a Breeding Soundness Exam prior to the sale date and will be ready to go to work. Elm Creek Ranch will offer to pay 100% of the insurance premium for mortality/loss of use insurance for bulls purchased at the sale at a sales price of \$10,000 or higher; 75% of the insurance premium on bulls purchased at \$7,500 or higher and 50% of bulls purchased with a price over \$5,000 of Elm Creek bulls on the date of the sale. Breeding age bulls sell with semen test and all bulls are guaranteed to be breeders the first breeding season with Breeding Guarantee noted in sale catalog.

Thank you for your interest in the Elm Creek program, past and continued support; we wish you success with your new Elm Creek genetics.

NORTHERN Exposure SALE

April 16, 2024

Sale: 2 p.m. CDT • Lunch: 12:30 p.m. CDT
At the Ranch, Hebron, ND

Auctioneer:

Seth Weishaar..... 307 896 6107

Representatives:

Dean Pike, American Salers Association..... 303-810-7605
Scott Ressler, ND Stockmen's Association..... 701-391-7310

Sale Location: Elm Creek South Ranch which is located right off of Interstate 94 at exit 102. If coming from the west it is simply a U-turn off of the interstate right into the ranch. If coming from the east, take a right off of the interstate and go through the underpass and take the first right turn into the ranch.

Trucking: We will offer a \$200 delivery credit per bull, if they are picked up the day of the sale. We offer free delivery within 30 days up to 300 miles OR BUYER can pick up at seller's ranch after 30 days. Consignors will feed bulls from 30-75 days of the sale with the buyer to arrange delivery after 30 days.

Internet Bidding: This sale will be broadcast through DVAuction with internet bidding available. See graphic to register.

Bidding: Each animal will be sold to the highest bidder. Any disputes will be settled by the auctioneer in charge. His decision is final.

Payment Terms: Payment in full is due at time of sale.

Buyer's Risk: Bulls are at buyers' risk immediately after the sale. Animals will be cared for as agreed, but at the purchaser's risk as to loss or injury.

Breeding Guarantee: Breeding age bulls sell with semen test. Bulls are guaranteed to be breeders the first breeding season. We need to be notified after the first breeding season in writing if there is a problem. The seller shall have six months to prove said animal or at mutual agreement to replace the animal. At no time shall the seller be liable for more than the purchase price of the animal. We will replace with a like animal or give full credit in next year's sale for the difference between purchase price and the salvage price of the animal.

Catalog Changes: Any changes from information printed in this catalog will be available in supplement data sale day or announced from the auction block at the time the animal is sold and such announcements shall take precedence.

Liability: All persons who attend the sale do so at their own risk and the management assumes no liability, legal or otherwise, for their safety or behavior of the animals.

Notice: Due to road construction, westbound Traffic on I-94 will need to exit the Interstate at either exit 108 or 110 and take County Road 139 (also known as Old Highway 10 west of Glen Ullin) to the ranch. Eastbound traffic on interstate 94 can still take exit 102 and turn right into the Ranch headquarters for the sale.

Insurance: Insurance for bull mortality/accidental death/loss of use insurance from Agent Troy Bargmann will be available sale day, 701-290-4043. Elm Creek Ranch will offer to pay 100% of the insurance premium for mortality/loss of use insurance for bulls purchased at the sale at a sales price of \$10,000 or higher; 75% of the insurance premium on bulls purchased at \$7,500 or higher and 50% of bulls purchased with a price over \$3,000 of Elm Creek bulls on the date of the sale.

Elm Creek Salers Herd Health: All cattle in this sale are in excellent condition and health. Elm Creek Ranch bulls will have had their breeding soundness exam and have been semen tested prior to sale date and will be ready for breeding.

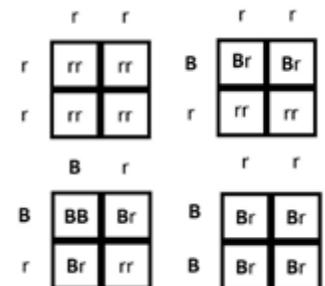

Feist Salers Health: All cattle in this sale are in excellent condition and health. Feist Salers Ranch bulls will have had their breeding soundness exam and have been semen tested prior to sale date and will be ready for breeding.

Retained Interest: On a few of these bulls, the seller has retained semen interest as indicated in the footnotes of their lot data. Selling "full possession and one-half semen interest" means that the seller is retaining a 50% revenue sharing interest and the right to use semen on the bull in herd. Sales from semen will be split between buyer and seller after deducting costs. Semen collection will be done before delivery and at the buyer's convenience if applicable in the future.

Accommodations: Brick City Motel, Hebron 701-878-4467

How Color Works in Cattle:

Each individual box represents a possible color expressed by the progeny of these likely matings.
B = dominate black gene
r = recessive red gene
rr - red (homozygous)
BB = black (homozygous)
Br = heterozygous black, red carrier

Bentley sires very desirable foot angle and claw structure. Calves sired by Bentley are average for birthweight with above average growth. Bentley is above average for heifer pregnancy as we kept all 2022 born heifers from Bentley and they all bred up within 42 days. Daughters are average to slightly above in milk ability. Bentley is above average for docility and scrotal in his sons. Bentley throws average to slightly above average frame score with heavy hair coats. This will be the last year to purchase a Bentley son as we lost the bull without a semen inventory.

David and Michele Feist

Welcome to the 10th Annual Northern Exposure Bull Sale. Last year we mentioned a strong cattle market tipping \$2.00/lb for a 700-pound steer. Never did we imagine that it would do what it's done since. We hope all our customers have managed to find joy in these markets, as today's prices are certainly well deserved after all the markets that have been less rewarding. We would like to thank Stan Saylor and the entire Elm Creek Ranch crew for hosting! Our 2024 bulls are sired by 41FTBS Laser, 242E Longshot, 92J Keys Monument, 101J Keys Frederick.

An old rancher once said, "You should spend a little extra money on two things...your bed and your boots. Because if you're not in one, you're in the other." This old rancher was our very own, Neal Feist. Last spring, we said goodbye to Neal as he passed away from cancer. Some would say he lost his battle, but those who worked beside him would say otherwise. In his last haying season, at 88 years old, Neal cut seven full quarters of hay with an open cab 4020 and baled 5,300 round bales. He spent many hours sitting in the field waiting for the moisture to be perfect to bale. He also would tell his worried daughters that he was going to go home to sleep, but would sneak out to the hayfield to get a few more hours of night baling in to perfectly preserve the alfalfa leaves.

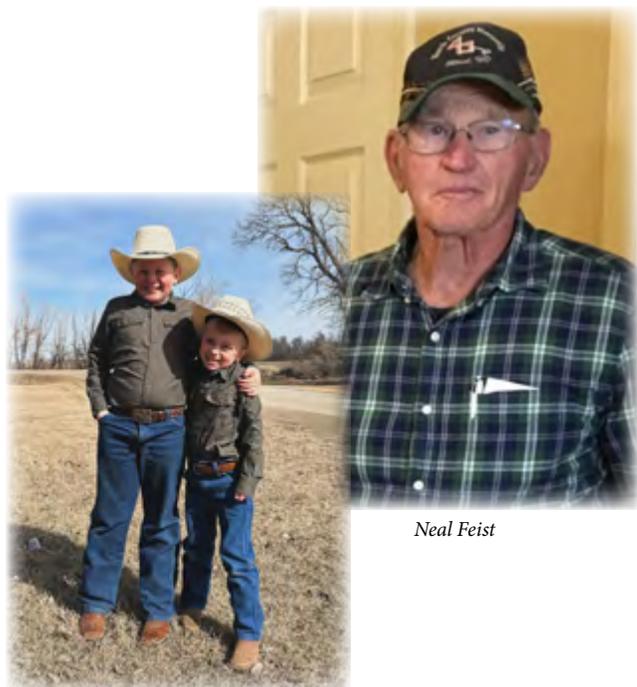

As we reflect on Neal's last season of doing what he loved, we can't help but smile and be thankful for the man he was and the work ethic he instilled in his family. The boots will never be filled, but the work will get done, even if it takes an army. Neal, along with Roy Moore and Gerald Effertz, imported the first Salers sire in May 1975. This bold move has allowed all of us to enjoy Salers cattle here in the United States for the last 49 years. Now it is our turn to produce and raise good quality Salers to continue the legacy for another 49 years. Here's to a life well lived and a dream well accomplished. Neal will be missed by many, but most certainly not forgotten. "Well done, good and faithful servant, enter into your rest."

The Feist Ranch has seen some more change this past year, as Gary came on fulltime as of June 1st, 2023. Gary will continue helping David manage and run the day-to-day operations. Jess officially became a Velva Aggie, as a 2nd grade teacher, but still enjoys helping when she can. Gary and Jess got married in December and we wish them many years of happiness! Together they continue to help tremendously, and we greatly appreciate all they do. We look forward to their future here and the future of the ranch!

Sincerely,
 David & Michele Feist
 Brad & Janyce Feist

• A Keys Cruiser 105C son.

Herd Health: Calves were vaccinated with Ultraback 7 and Bovishield Gold 5 in the Spring and were boosted with Bovishield Gold 5 with One Shot and Ultraback 7 with Somnus. No creep feed was given, and they were handfed GTA Headstart until February when they were put on Free Choice Bull Challenger and prairie hay. The bulls were wormed with Dectamax (injectable) and poured with Ivermectin and repoured later with Clean Up II. Actual weights on the bulls in pasture were taken with no creep feed. Current weights and scrotal measurements will be available sale day. The bulls will also be semen tested prior to sale.
